News Release 2018-02

InZinc Commences Drill Program at West Desert Project

Vancouver, BC – InZinc Mining Ltd. (TSX-V: IZN) (the “Company”) is pleased to announce it has commenced diamond drilling at the Company’s 100% owned West Desert zinc-copper project in Utah. The large zinc resources contained in the WD deposit and outlined in the 2014 Preliminary Economic Assessment remain open for expansion in several directions. The Phase 1 program of approximately 3,500m will focus on exploration and expansion of the WD deposit and the highly prospective area to the east.

Silver-Rich Zinc Potential

Wide spaced drilling will explore for silver-rich mineralization previously intersected in both the upper east portion of the WD deposit (CC08-11 returned 7.4 oz/t Ag, 4.3% Zn over 10.8m at 200m below surface) and 650m east in historical drill hole CC-43 (5.1 oz/t Ag and 6.8% Zn over 4.9m) which is located below the past-producing Utah silver mine (2.7M oz silver).

Copper-Rich Zinc Potential

The holes testing the silver-rich zinc potential are planned to extend at depth into an area of high grade copper-rich zinc potential as intersected in historical hole CC-43 (7.6% Zn, 3.5% Cu and 1.0 oz/t Ag over 3.1m).

Higher Grade Zinc

An additional focus of the drill program is delineation of high grade zinc (C07-02 returned 27.30% Zn over 17.37m) and associated indium mineralization in the western portion of the WD deposit.

Drill Program at Indy Project

Permitting has been initiated for a diamond drilling program this summer at the Indy zinc project in BC.

About InZinc

InZinc is focused on growth in zinc through exploration and expansion of the advanced stage West Desert project (100%) in Utah and exploration of the early stage Indy project (100% option) in British Columbia. West Desert has a large underground resource open for expansion and has district scale exploration potential. A West Desert Preliminary Economic Assessment completed in 2014 forecasted 1.6 billion pounds of zinc production over 15 years. Indy comprises both near surface exploration targets and regional discovery potential. Both zinc projects are well located with easy access and existing infrastructure. The Company is well financed to conduct 2018 exploration programs.
